Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/084,981	Applicant(s) JANSEN, STEFAN	
	Examiner Michael C. Wimer	Art Unit 2821	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10/17/2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 38-40,44,46,48 and 119 is withdrawn in view of the newly discovered reference(s) to Yao et al. (6052093) and Lee (4975711).

Rejections based on the newly cited reference(s) follow.

2. Claims 49-98 and 120-123 are allowed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 38-40 and 119 are rejected under 35 U.S.C. 102(b) as being anticipated by Yao et al. (6052093).

Regarding Claims 38-40 and 119, Yao et al. show an antenna comprising an element 26,34 formed from conductor patterns on a plurality of layers including at least one buried layer 34 of a multilayer PCB, the PCB is apertured 22,24 adjacent to the element 26,34, and the conductor patterns are in stacked relation and interconnected through the PCB (via the transition points 36,36A, defined as vias), all arranged as recited.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2821

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 44, 46 and 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yao et al. (6052093) in view of Lee (4975711).

Regarding Claims 44, 46 and 48, Yao et al. show an antenna comprising an element 26,34 formed from conductor patterns on a plurality of layers including at least one buried layer 34 of a multilayer PCB, the PCB is apertured 22,24 adjacent to the element 26,34, and the conductor patterns are in stacked relation and interconnected through the PCB (via the transition points 36,36A, defined as vias). Although, Yao et al. show a printed circuit board antenna in multiple layers used for inventory tags integrated within a transceiver board, there is no specific suggestion that the antenna is included in a mobile phone, as recited in the preamble of these claims. Therefore, the patent to Lee is cited as evidence of obviousness and as resolving the level of skill in the antenna art and shows a slot antenna used within a mobile phone 1. It would have been obvious to the skilled artisan to employ the antenna of Yao et al. in a mobile phone, as suggested and taught by Lee.

Response to Arguments

7. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
